Attention: Christopher A. Urban, Chief Natural Diversity Section

Subject: Windolph Knoll Project
West Pikeland Township, Chester County, PA
SIR# 28534, PNDI Search # 20080425138183

Dear Mr. Urban:

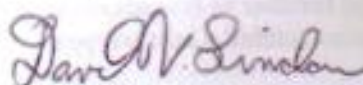

We are updating our files on this project and please refer to your letter dated May 27, 2008 and my previous letter dated April 25, 2008 (copies with attachments are included). As your past letter is nearly two years old, Pa DEP requires us to obtain an update letter.

In your May 27th letter, you indicate that there may be a suitable bog turtle habitat on the proposed project site. The site is presently a cultivated farm field with a hay crop. However, well off the site and on the adjacent property to the northeast on long Upper Pine Creek Road there is area with possible wetlands.

Subsurface drip disposal systems need to be installed in moderately well drained or deep well drained soils. The soils in the proposed disposal area have been evaluated by Soil Scientist with test probes witnessed by the Pa DEP Regional Soil Scientist for suitability for Drip Disposal. There are no wetland type soils in the proposed project area.

Should you require any additional information and have any questions please feel free to contact me at your convenience.

Very truly yours,

David V Linahan, PE
Consulting Engineer

To whom it may concern:

In an effort to streamline our threatened and endangered species environmental review process, reduce the redundancy in project reviews and ease our staff workload, the Pennsylvania Fish and Boat Commission has delegated coordination/consultation of joint state/federally listed species impact reviews to the PA Field Office of the U.S. Fish and Wildlife Service. Based on records maintained in the Pennsylvania Natural Diversity Inventory (PNDI) database and our own files, the potential conflicts generated by your project fall under their jurisdiction. Please send your project materials *if you have not already done so* to them at:

**U.S. Fish and Wildlife Service
Endangered Species Section
315 South Allen St, Suite 322
State College, PA 16801-4851**

A separate response from the Pennsylvania Fish and Boat Commission is not needed for the review of Windolph Knoll Project

PNDI Search ID N/A, unless a threatened or endangered species is found on the project site or as requested by the USFWS upon review of your project materials.

Thank you for your cooperation and attention to this matter of endangered species conservation and habitat protection.

Sincerely,

Christopher A. Urban, Chief
Natural Diversity Section

We are updating our files on this project and please refer to my previous letter dated April 25, 2008 (a copy with attachments are included). Your response to my previous letter appears to be missing from our files, however since it has been over two years since my initial request, PA DEP requires an updated letter from your agency.

A subsurface drip disposal system is proposed for this site. The site is presently a cultivated farm field with a hay crop. Subsurface drip disposal systems need to be installed in moderately well drained or deep well drained soils. The soils in the proposed disposal area have been evaluated by Soil Scientist with test probes witnessed by the Pa DEP Regional Soil Scientist for suitability for Drip Disposal. There are no wetland type soils in the proposed project area.

Should you require any additional information, please do not hesitate to contact me at your convenience.

Very truly yours,

David V Linahan, PE
Consulting Engineer
