

May 29, 2009

Dear West Pikeland Township Resident:

Enclosed is a Sewage Needs Survey that property owners in selected areas of the Township are being asked to complete as part of an on-lot sewage system study in the Township.

This survey will help us evaluate the condition of on-lot sanitary sewage systems in West Pikeland Township. Please complete the survey and return it to the Township in the postage paid envelope that is enclosed **no later than June 16, 2009**.

As a follow up to this survey, Township and County Health Department representatives will be conducting a field survey of properties with on-lot sewer systems during the week starting June 22nd. **This letter serves as notice that personnel may be visiting your property as part of the survey process.** It will not be necessary for you to be at home during this time period as the work will be conducted outside of the home. However, it would be much appreciated that if you have any pets that they be contained inside your home so as not to interfere with the personnel.

If you have any questions about the Sewage Needs Survey or the field survey, please contact me in the Township office during regular work hours.

Sincerely,

Township Manager
