

PLEASE NOTE:

# EROSION AND SEDIMENTATION CONTROLS (SILT SOCKS) ARE REQUIRED

**Regardless of whether a stormwater management permit is required, all small projects, including pools and additions, are required to have E&S controls, silt socks, properly installed, to prevent sediment-laden stormwater runoff from leaving the construction site.**

The Chester County Conservation District no longer accepts silt fences as proper E&S controls.

See the Stormwater Management Ordinance table 106.1, PA Code, Title 25, Chapter 102 of the PA Code and the Pennsylvania Clean Streams law, which show that, even if exempt from the need for a drainage permit.
