March 6, 2026

Dear Neighbor:

This spring, Natural Lands will be conducting a prescribed burn on the top meadow in the Binky Lee Preserve. The goal of the burn is to help control invasive plant species such as Multiflora rose, Japanese honeysuckle, Bittersweet, and Canada thistle, while encouraging native grasses and wildflowers.

A prescribed burn is a controlled application of fire to natural fuels under appropriate weather conditions, fuel moisture, and soil moisture conditions. This will confine the fire to a predetermined area and at the same time will produce the intensity of heat and rate of spread required to accomplish our goals. The burn will only occur if all necessary conditions are met.

The burn will be conducted between March 16<sup>th</sup> to April 15<sup>th</sup> when weather conditions are appropriate. The burn will be conducted in the afternoon and be completed before dusk. If you have any concerns, questions or wish to be notified individually on the day of the burn, please contact me at (610) 353-5587 ext. 505.

Binky Lee Preserve is part of Natural Lands' 23,000-acre network of conserved spaces across eastern Pennsylvania and southern New Jersey. Natural Lands, which is member supported—has preserved more than 135,000 acres and works every day to fulfill our mission to save open space, care for nature, and connect people to the outdoors and each other. We welcome you to plan a visit to our preserves—all open to the public, free of charge—and explore the ways we pursue our conservation mission at [www.natlands.org](http://www.natlands.org).

Thank you for your support of Natural Lands and the Binky Lee Preserve.

Sincerely,

Darin Groff  
Preserve Manager / Regional Manager / Fire Coordinator

cc: West Pikeland Township - Fire Marshal
